<b>Hydraulic Pressure</b>	2950 psi

Specifications based on ASAE standards S301.3 and furnished for general information only as they can vary with different tractor models. Specifications are subject to change without notice, and without liability therefore.

COMPETITION

KMW

**KMW GETS THE STRESS OUT!**

The less red you see...*the less stress there is.* This Finite Element Analysis confirms that KMW Mounting Kits are designed to maximize strength and loader performance compared to the competition. That's another reason KMW loaders are more rugged and last longer.
